

ION

Take Back Control

Introducing the World's First Intermodal Container Management System

Intermodal Operations Navigator

REGISTER FOR OUR BETA PROGRAM AT WWW.C2LABS.COM/ION

C2 ION allows organizations to securely move application containers between on premise and public cloud service providers as well as between environments (DEV, TEST, QA, PROD), enabling cloud portability while automating the software development lifecycle.

FEATURES

- Blacklist / Whitelist Images and Commands
- Monitor developer actions based on security policy
- Move applications seamlessly between clouds & environments

BENEFITS

- Enhance Developer Productivity without sacrificing security
- Close Existing Container Security Holes
- Visualize your applications across clouds and environments
